

DC ONE

ON DEMAND

The 65mm flat burrs provide an extremely precise grind. The grinder also offers automatic detection between a single and double shot.

CONTROL & PRECISION

Exact grinding time, down to the millisecond. The grinding point features a millimetric digital setting to maintain complete control over your coffee.

TEMPERATURE

The automatic cooling system prevents coffee from overheating.

VERSATILE

The DC Two can operate autonomously in Competition mode or work as part of the Grinder Control System (GCS).
