DETAILS

ADVANCED TECHNOLOGY

Zero Plus Barista integrates all innovations into one powerful platform: digital flow regulation, multiboiler technology, grinder control system, and gravimetrics. Engineered for precision and reliability, it brings unmatched control to your coffee program.

CREATE YOUR PROFILE

Fine-tune water flow, digitally or freestyle, using digital flow regulation. Adjustable flow rates, from 3 to 9 grams per second, unlock the full flavor potential of every coffee, whether you're highlighting a single origin or dialing in a signature blend.

SAVE & REPEAT

Baristas can save and name custom extraction profiles directly in the machine's internal library. Once a recipe is stored, it can be reproduced consistently across every shot, ensuring reliability, repeatability, and a flawless customer experience.
